Motors:

Each motor below comes in both a low and High Torque. The low torques works with the smaller hands from 1" – 7", and the high torques works with our long hands from 8" up to 12" long. Simply measure the thickness of your dial and see which motor below will work for you. These motors are called push-on types, as the hands are simply pushed on to the shaft and stays tightly in position without the need of a nut to hold them in place. Each motor's thread shaft is 1/4" in diameter.

			
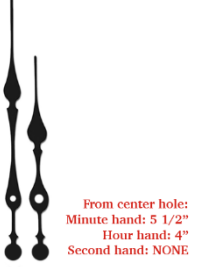

1" thread shaft, with a total shaft length of 1 5/16". For with dials up to 7/8" thick.	3/4" thread shaft, with a total shaft length of 1 1/16". For with dials up to 5/8" thick.	1/2" thread shaft, with a total shaft length of 3/4". For with dials up to 3/8" thick.	1/4" thread shaft, with a total shaft length of 1/2". For with dials up to 1/8" thick.
			
I-MOTOR: 1/4" thread shaft, with a total shaft length of 1/2". For with dials up to 1/8" thick.	I-MOTOR: 1/2" thread shaft, with a total shaft length of 3/4". For with dials up to 3/8" thick.	I-MOTOR: 3/4" thread shaft, with a total shaft length of 1 1/16". For with dials up to 5/8" thick.	I-MOTOR: 1" thread shaft, with a total shaft length of 1 5/16". For with dials up to 7/8" thick.

Hands:

All our hands are sold with our motors. Some of the larger hands work with the I-Motors while all the rest work with the Push-On motors. They are made of metal, and some from plastic, but all can be easily trimmed down to a shorter size - if the design allows it - using any household scissors. Some hands require you to peel away a protective plastic film. Purchase the hands with any of our motors from our website by clicking the links below them. Hands are sorted by size.
